Improving Mathematics in the Early Years and Key Stage 1 reviews the best available evidence to offer five recommendations for developing the maths skills of 3–7-year olds. Recommendations include integrating maths into different activities throughout the day – for example, at registration and snack time – to familiarise children with maths language and make the most of the school day. It also highlights that story and picture books can be a powerful tool for engaging children with basic maths concepts, while board games (such as Snakes and Ladders) are particularly beneficial to developing understanding of numbers.

- Develop practitioners' understanding of how children learn mathematics
- Dedicate time for children to learn mathematics and integrate mathematics throughout the day
- Use manipulatives and representations to develop understanding
- Ensure that teaching builds on what children already know
- Use high quality targeted support to help all children learn mathematics

Costs

£295

Dates

30/11 ~ 03/2 ~ 29/3
